★ **Work Reference, Labelgrup**

To whom it may concern,

I am delighted to recommend my former colleague, Iñigo Moreno Ramos.

Iñigo worked with me from September of 2021 to April of 2022.

During the time, I was really impressed by his general performance, particularly on his knowledge of React as well as his hunger for learning. He worked specifically in the Sfera project, related to The pharmaceutical field.

His abilities in programming allowed us to shorten the development weight, as well as an intern redesign, which was a great help in the later development of the platform. Those skills were put into consideration by the client.

I was able to work daily with him. It was easy to communicate and always ready to contribute his opinions about the project

concerning an upgrade of the project whenever possible, in addition to cooperating with the team when needed. With a critical mindset but positive, always wanting to bring the project a step forward.

Regarding the personality, a lovely colleague, with whom you could talk about anything. Without any doubt, he will be a very valuable asset for any company.

Regards,

José Luis Español – Senior Back End developer, Labelgrup
